

RODRIGO ARIEL MENDIETA CANESTRINI

Junior Web Developer | Systems Analyst

ABOUT ME

I am a software developer with over two years of experience in web application development, primarily using Java technologies. I also have knowledge in languages such as JavaScript, Python, and Django.

Throughout my career, I have worked on projects from the conceptual phase to their implementation in production environments. Currently, I work as a software developer at DGCyE (Dirección General de Cultura y Educación de la Provincia de Buenos Aires) and I am constantly learning new technologies.

My goal is to continue growing professionally, taking on new challenges and providing innovative solutions in the field of software development.
